

SYED SAFEER

Senior Azure Cloud Engineer | Azure Infrastructure Engineer | Cloud Operations Engineer

Mumbai, Maharashtra | +91-8446385557 | syedsafee@outlook.in | <https://www.linkedin.com/in/syedsafee/> | <https://safee555.github.io/Portfolio/>

PROFESSIONAL SUMMARY

Senior Azure Cloud Engineer with 4 plus years of enterprise experience architecting, administering, and optimizing production cloud infrastructure across Microsoft Azure and AWS. Proven track record leading AWS-to-Azure migrations, designing Hub-Spoke networking with Application Gateway, WAF, and Azure Firewall, and deploying VM Scale Sets for elastic, highly available workloads. Skilled in Azure Backup, Azure Site Recovery, and Azure Migrate for enterprise-grade disaster recovery and cloud migration programs. Deep expertise in Microsoft Entra ID, RBAC, and Conditional Access for identity governance at scale, paired with Azure Monitor, Log Analytics, and KQL for proactive incident management and root cause analysis. Strong Linux and Windows Server administration background with hands-on cost-optimization delivery, including a Glacier Deep Archive initiative that cut recurring cloud spend. Recognized for driving 99.9% infrastructure availability, reducing incident MTTR, and translating complex cloud operations into measurable business outcomes across 5+ Azure subscriptions supporting 4000+ users.

CORE TECHNICAL SKILLS

Cloud Platforms	Microsoft Azure, AWS (cross-cloud operations & AWS-to-Azure migration)
Compute Services	Azure Virtual Machines, VM Scale Sets (VMSS), App Service, App Service Environment, Static Web Apps
Networking	Virtual Network (VNet), VNet Peering, Subnets, NSG, Route Tables, NAT Gateway, Private/Public DNS, Private Endpoints, Load Balancer, Application Gateway, WAF, Azure Firewall, Traffic Manager, Azure Front Door, VPN (P2S/S2S), ExpressRoute, Azure Bastion, Hub-Spoke Topology
Identity & Security	Microsoft Entra ID (Azure AD), RBAC, MFA, Conditional Access, PIM, Identity Governance, Service Principals, Azure AD Connect, Key Vault, Managed Identity, Azure Policy, Disk Encryption
Monitoring & Logging	Azure Monitor, Log Analytics Workspace, Diagnostic Extensions, KQL (Kusto Query Language), Activity Logs, Root Cause Analysis (RCA), Incident Management, Grafana
Backup & Disaster Recovery	Azure Backup, Recovery Services Vault, Azure Site Recovery (ASR), High Availability, Disaster Recovery (DR) Planning & Failover Testing
Storage & Databases	Azure Storage Accounts, Blob Storage, Azure File Shares, Azure SQL Database, Cosmos DB
Migration Tools	Azure Migrate, Azure Landing Zones, Cloud Adoption Framework, Application Modernization
Automation & DevOps	PowerShell, Terraform, Azure DevOps, GitHub, Docker, Automation Account
Operating Systems	Windows Server, Linux Server (patch management & production administration)

PROFESSIONAL EXPERIENCE

Senior Cloud Infrastructure Engineer — Kiya.ai

Feb 2025 – Present

Mumbai, Maharashtra

- Administer and optimize 100+ production Azure Virtual Machines, Storage Accounts, and networking components across 5+ subscriptions, sustaining 99.9% uptime for business-critical workloads.
- Perform root cause analysis on Azure infrastructure incidents spanning VM availability, storage, and networking configurations, implementing corrective actions that reduced recurring incidents and improved mean time to resolution (MTTR).
- Manage Windows and Linux server patch compliance across 100+ servers, strengthening security posture and maintaining operational compliance across production environments.
- Coordinate cross-cloud operations across Azure and AWS, aligning infrastructure activities and incident response across 10+ production applications, and led end-to-end AWS-to-Azure migration with cutover strategies that minimized downtime and preserved service continuity.
- Designed and implemented a cost-optimization initiative archiving AWS EC2 data to Amazon S3 Glacier Deep Archive prior to EC2 decommissioning, reducing recurring storage costs by 80%.
- Diagnosed a critical production incident causing intermittent API failures; isolated an idle-timeout misconfiguration as root cause and resolved it, eliminating recurrence and restoring service reliability.

- Strengthened Azure Backup and Recovery Services posture in partnership with cross-functional teams, improving infrastructure resilience and cloud administration best practices.

Azure Cloud Engineer — LTIMindtree

Jan 2024 – Nov 2024

Hyderabad, Telangana

- Delivered Azure Backup and Recovery Services support for enterprise clients, analysing requirements and resolving backup failures to safeguard production data integrity.
- Investigated production incidents using KQL and Azure Monitor logs, accelerating root cause identification and reducing incident resolution time across client environments.
- Executed Azure backup and restore operations aligned to defined recovery objectives, prioritizing data integrity and minimizing downtime across [100+] workloads.
- Configured and validated Azure Site Recovery (ASR) for workload replication and disaster recovery, conducting failover readiness testing to ensure recovery reliability.
- Directed workload migration planning and execution using Azure Migrate, moving on-premises applications to Azure with minimal business disruption.
- Provided technical guidance to enterprise clients throughout backup, recovery, and migration engagements, strengthening client confidence in cloud resilience.

Azure Cloud Administrator — Jetto Technologies and Consultancies

Feb 2022 – Jan 2024

Aurangabad, Maharashtra

- Deployed, configured, and administered Azure IaaS and PaaS resources across enterprise cloud environments supporting 4000+ users.
- Administered Microsoft Entra ID (Azure AD) — user/group lifecycle, licensing, RBAC, MFA, Conditional Access, Identity Governance, and Azure AD Connect synchronization for 4000+ identities.
- Designed and administered enterprise Azure networking (VNETs, subnets, NSGs, VNet peering, NAT Gateway, route tables, Private/Public DNS, Hub-Spoke topology) supporting 100+ virtual machines.
- Deployed and scaled Windows and Linux Virtual Machines and VM Scale Sets (VMSS) to support elastic, high-availability production workloads.
- Implemented enterprise monitoring via Azure Monitor, Log Analytics, and Diagnostic Extensions; authored KQL queries that accelerated troubleshooting and reduced MTTR.
- Architected high-availability solutions using Load Balancer, Application Gateway, and WAF; hardened workloads with Azure Firewall and NSGs, achieving 99.9% availability.
- Deployed Azure Landing Zones and standardized cloud foundations aligned to the Cloud Adoption Framework, improving governance across new workload onboarding.
- Managed Azure Storage, Blob Storage, and File Shares; implemented backup/recovery via Recovery Services Vault protecting 5+ TB of enterprise data, and configured Azure Site Recovery to meet defined RTO/RPO targets.
- Administered Azure SQL Database and enabled secure hybrid connectivity via Point-to-Site VPN, Site-to-Site VPN, and ExpressRoute.
- Automated routine administrative operations via PowerShell scripting, reducing manual effort by [70%]; supported Static Web Apps, SSL certificate management, and HLD/LLD documentation aligned to the Cloud Adoption Framework.

KEY CLOUD ACHIEVEMENTS

- Led a full AWS-to-Azure migration program, minimizing downtime and maintaining continuous service availability throughout workload cutover.
- Delivered a cloud cost-optimization initiative (EC2 → S3 Glacier Deep Archive) that reduced recurring storage spend by 80% ahead of decommissioning.
- Resolved a critical API-availability incident through root cause analysis, converting a recurring production issue into a permanent fix.
- Implemented enterprise-wide backup and DR architecture (Azure Backup, Recovery Services Vault, Azure Site Recovery) safeguarding 5+ TB of production data.
- Designed Hub-Spoke network architecture with Application Gateway, WAF, and Azure Firewall, achieving 99.9% high availability for production workloads.

CERTIFICATIONS

- [Microsoft Certified: Azure Administrator Associate \(AZ-104\)](#)

EDUCATION

- Bachelor of Computer Science (BCS) — Dr. Babasaheb Ambedkar Marathwada University, Aurangabad, Maharashtra — 2021
- Languages: English, Hindi
